

“VITAL: VarlanT Alzheimer”

A post of engineer assistant (third year degree of university required) in Cellular Biology is available at the Physiopathology and Genetics of Neuron and Muscle (PGNM) Institute, in the team “Genetics and Metabolism of Neuronal Development” directed by J Courchet.

The duration of the contract will be 12 months with possible renewable.

The successful candidate will work on a project aiming at investigating new therapeutical approaches in the context of Alzheimer disease with a special focus on stimulating autophagy.

We are looking for highly motivated candidates, with experience in neurobiology, in murine models, histological preparations (brain sections, analysis of the number of synaptic spines, neuronal death, etc.). Experience in stereotaxic injections could be a plus.

The team is located in the Rockefeller campus of Lyon, at the university of Medicine, a site highly dynamic with students from all over the world. The city of Lyon is one of the France’s oldest cities, a UNESCO World Heritage site, considered also the gastronomic capital.

The application including a cover letter, a CV, a description of previous career and career objectives (max 1 page), a letter of reference, and the contact of two potential referents, must be sent to flavie.strappazon@cnrs.fr

The contract will start in September 2023.
